PROFILE

With over 25 years of experience in graphic and decorative design, I've honed my ability to capture client needs and organize efficient workflows that optimize time. My career includes leading projects and teams, managing a top account in a globally recognized e-commerce platform for over 20 years, and configuring various payment platforms. Running my own e-commerce for more than 8 years has further refined my skills.

In my growing career as a frontend developer, I've already contributed to the creation of seven websites, demonstrating my ability to learn and adapt quickly to new technologies and resources. My strong verbal communication skills complement my technical abilities, ensuring clear and effective collaboration.

I'm available full-time and am flexible to work in different time zones.

EXPERIENCE

APPLICATIONS DEVELOPMENT

March to August '24

Frontend Developer • MÉXICO | remote • <https://upnomada.com/>

▪ ref.: Hiram Cano Díaz – Upnomada - ☎️ +52 1 951 252 6120

"I designed and developed a comprehensive website for Upnomada, a Mexican company, using React.js. The site includes three distinct sections: one for visitors, one for subscribers, and one for administrators.

In this project, I handled all frontend development tasks. Key features include a user registration system with email verification, subscription payments via Stripe integration, and a login system that supports Google account access. I also developed the Flights Offers page, complete with sorting and filtering options, as well as offer details. Additionally, I built the Itineraries section, User Profile management, and the entire admin section, which includes creating offers and managing users."

Dicember '23 to May '24

Frontend Developer • USA | remote •

<http://ascar-portal-client.s3-website.us-east-2.amazonaws.com>

▪ ref.: Pablo Kerestezachi – Ascar TM - ☎️ +54 9 3513 98-0612

"I designed and developed a website for U.S. courier companies as part of a private project for Ascar Software. The website, built with React.js, includes a range of features such as tracking, payments, and multi-user login.

My role as a front-end developer involved managing the project step by step, implementing functionalities to handle and retrieve data from databases or external APIs like Google Maps, enabling the creation of shipping orders, user management, form printing, and email notifications. The project was paused in May 2024."

APPLICATIONS DEVELOPMENT

November '23 to January '24

WordPress Designer • Colombia | remote

▪ ref.: Santiago Gomez – Agencia Pro Market - ☎️ +57 312 6000189

Projects:

1- Valeria Landeo – Respira la vida | <https://respiralavida.com>

2- Juliana Calle – El Club | <https://elclub.co>

3- Leidi Cuadros – Rituales de Prosperidad | <https://conexion-angelical.com>

"I designed web pages for Agencia Promarket, a marketing agency startup. I focused on developing stylish, modern websites and web services for small businesses, including automated emails and payment gateways. During my time there, I built three WordPress-based sites for different clients, tailoring each to their unique needs."

Oct. '23

Frontend Developer • Colombia | remote • <https://mibutaca2023.vercel.app>

▪ ref.: Carolina Tobar – Grupo 3 creativo - ☎️ +57 318 4916383

"I designed and developed a website for Grupo 3 Creativo, a Bogotá-based events company, as part of the "Proyecto Mi Butaca". Using React.js, I built a feature-rich site with functionalities including seat reservations, payments, and user logins. As a member of the front-end development team, I contributed to user registration and Google account integration, event details, seat selection, ticket purchasing, and payment processing."

Other Projects in which I have participated.:

GRAPHIC DESIGNER

December '97 – August '22

Graphic Designer & Developer • Argentina • freelance

"Throughout my career as a graphic designer, I have created a wide range of materials including logos, commercial stationery, magazines, advertising images, posters, billboards, and lettering. My expertise includes image vectorization, optimization for websites (e.g., webp), GIF animations, and video creation and editing. Additionally, I have managed various e-commerce platforms and handled digital advertising on Google and Meta."
